

A better way to build, together

Autodesk Construction Cloud connects workflows, teams and data at every stage of construction to reduce risk, maximize efficiency, and increase profits.

Connected workflows, teams and data at every stage of construction

CONNECTED WORKFLOWS

Seamless collaborate with powerful, simple software.

Linked workflows move information between teams quickly, and critical context doesn't get lost along the way. Plan, escalate and resolve work all in one place.

CONNECTED TEAMS

Drive trust and collaboration across teams

Powerful, purpose-built tools for all construction stakeholders. Model the right workflows for your projects and easily manage how information is shared with partners, securely.

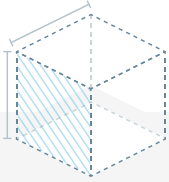

CONNECTED DATA

Improved project outcomes with predictive insights and analytics

Bring together project and third-party data to deliver predictive insights to identify, prioritize, and resolve risk, cost, and quality issues on the spot.

Connected Construction with Autodesk Construction Cloud

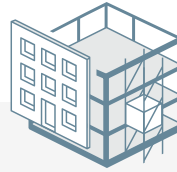

DESIGN

- Design Authoring
- Design Collaboration

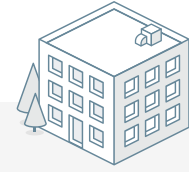

PLAN

- BIM Coordination
- Quantity Take Off
- Bidding
- Qualification
- 3D Coordination

BUILD

- Project Management
- Field Collaboration
- Quality & Safety
- Cost Control
- Project Closeout

OPERATE

- Facilities Maintenance
- Asset Lifecycle

Unified Data: Models | Drawing | Images | Documents | Cost Items | Assets | As-Builts | Photos | Videos

Insights: Dashboards | Reports | Construction IQ | Data Connector

“Autodesk Construction Cloud™ brings together advanced technology. This is the next evolution, the connected tissue that brings it all together so the construction lifecycle is no longer disjointed.”
